Heavy Metal Detox System

**Toxic heavy metals have an impact on health.**  
Learn more about the sources, signs and solutions for heavy metal toxicity.

Toxic heavy metals pose a serious threat to our **physical and mental health**.

### ✔ | the **culprits**

Even as a result of simple, everyday exposure, traces of toxic heavy metals have been building up and are stored in every human body on the planet. Having no beneficial metabolic function, the adverse effects resulting from these toxins can begin quickly and escalate into serious health concerns.

### ✔ | the **sources**

From auto exhaust, industry emissions and pesticides – to prescription medicines, dental fillings, solvents, and household cleaning products – to personal products like cosmetics, deodorant and toothpaste – heavy metals are in our environment to stay. And when heavy-metal toxins are in our environment, they are in our bodies, with a potentially devastating impact on health.

### ✔ | the **signs**

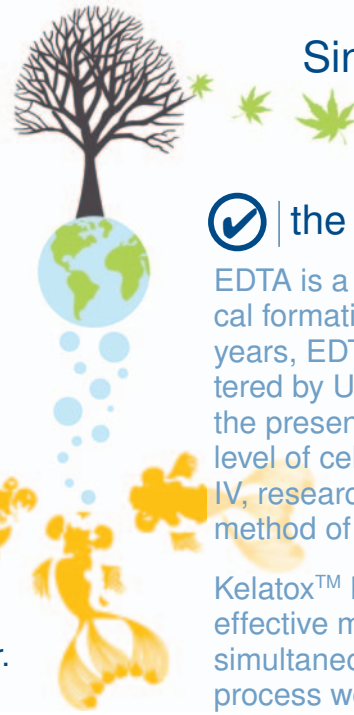

Heavy metal accumulation causes increased free-radical formation which results in cell oxidation. This, in turn, has been linked to many common health challenges, including cancer, candida, cardiovascular ailments, arthritis, fibromyalgia and chronic fatigue. Many neurological diseases, including depression, multiple sclerosis, Alzheimer's and Parkinson's disease, have also been strongly associated with cell oxidation. This breakdown in cell health is the main factor in accelerating the body's aging process.

When combined with a healthy lifestyle, Kelatox™ can add years to your life *and* life to your years.

Lead.  
Mercury.  
Aluminum.  
Cadmium.  
Arsenic.  
Nickel.

Drinking water.  
Auto exhaust.  
Pesticides.  
Prescriptions.  
Dental fillings.  
Cleaners.  
Cosmetics.

Cancer.  
Heart disease.  
Diabetes.  
Autism.  
Arthritis.  
Asthma.  
Chronic fatigue.  
Prostate issues.  
Alzheimer's.  
Parkinson's.

**Kelatox. Because your health matters.**

Since our bodies do not have an efficient method for eliminating heavy metals, we need a little **outside help**.

### ✔ | the **solution**

EDTA is a powerful antioxidant that actually prevents free radical formation, and the resulting cell oxidation. For more than 50 years, EDTA chelation therapy has been successfully administered by U.S. medical practitioners, for the purpose of reducing the presence of toxic heavy metals in the body and lowering the level of cell oxidation. Traditionally delivered in-office thru an IV, research and clinical studies have shown the rectal delivery method of EDTA to be more gentle and just as effective.

Kelatox™ EDTA chelation suppositories provide a safe and effective method for clearing the body of toxic heavy metals, and simultaneously promoting cell health. Kelatox's detoxification process works overnight, reducing the toxic stores while you sleep. In addition, Kelatox is used in the privacy and comfort of your own home, without the need for in-office medical supervision. One box of Kelatox suppositories is roughly equal to 10 IV chelation treatments, and is a fraction of the price.

### ✔ | the **benefits**

EDTA chelation therapy has been shown to dramatically improve many of our modern health conditions, as well as provide a long-term boost in overall energy levels and vibrancy. Heavy metal detoxification is an essential step in promoting good health and improving our quality of life.

Increased energy.  
Cardiovascular health.  
Immune health.  
Prostate health.  
Weight management.  
Emotional fortitude.  
Mental acuity.  
Longevity.  
Stamina.

Kelatox™ is an effective, convenient and cost-efficient treatment for the safe removal of toxic heavy metals.

Ask your doctor how **Kelatox™** can help you safeguard and improve your health.
